Career Objective

A motivated Computer Science Engineering (AI) student with a strong interest in Artificial Intelligence and Machine Learning, seeking an internship opportunity to gain practical industry experience. Building a foundation in machine learning, data structures & algorithms, Python, and computer systems through coursework, hands-on projects, and self-directed learning. Interested in exploring research in Applied Machine Learning and Computer Vision while applying my knowledge to real-world problems and contributing to meaningful AI-driven solutions.

Education

Tertiary Education: Bachelor of Engineering in Computer Science (AI Specialization) **2025 – 2029**
Chandigarh University, Gharuan, Punjab
CGPA: 9.67

Senior Secondary Education: HBSE Board **2024 – 2025**
C.R. Sr. Sec. School, Jhajjar, Haryana
Percentage: 98.6%

Secondary Education: HBSE Board **2022 – 2023**
C.R. Sr. Sec. School, Jhajjar, Haryana
Percentage: 98.2%

Projects

Instruction Set Simulator | *C++, Data Structures, GitHub* **August 2026**

- Built a console-based Instruction Set Simulator that converts arithmetic expressions into 3-address, 2-address, 1-address, and 0-address instruction formats.
- Implemented expression validation, infix-to-postfix conversion using stacks, and automatic instruction generation for compiler and computer organization concepts.
- Followed a modular programming approach.
  GitHub

PQC Algorithm Recommendation System | *Flask, Python, Machine Learning* **July 2026**

- Developed a web-based decision support system that recommends **NIST-standardized** Post-Quantum Cryptography (PQC) algorithms based on security, performance, memory, and application requirements.
- Trained and deployed an XGBoost machine learning model achieving and integrated it into a Flask web application.
- Built an interactive UI, automated preprocessing using OneHotEncoder, and deployed the application on Render for public access.
  GitHub

PhishGuard AI — Real-Time Phishing Detection System | *Python, Flask, Machine Learning, JavaScript, HTML* **April 2026**

- Built a full-stack cybersecurity system that detects phishing URLs in real time using a Machine Learning model.
- Developed a Chrome Extension for real-time browser protection, flagging malicious URLs as users browse the web.
- Implemented automated email alerts to instantly notify users when a phishing threat is detected.
  GitHub | Live Demo

Technical Skills

Languages and Frameworks: C++, Python, C, Java, Flask

Core Concepts: Data Structures & Algorithms, Machine Learning, Object-Oriented Programming, Natural Language Processing

Development Tools & Technologies: GitHub, Microsoft Azure, GitHub Copilot, SQL, VS Code, Render

Interpersonal Skills

Teamwork & Collaboration, Time Management, Adaptability, Active Listening, Calm under Pressure

Achievements

- Secured 3rd position in Ideathon (2026), organized by Ignite Youth Club in collaboration with IKS, Chandigarh University
- State Topper, Science Stream (2025) — C.R. Sr. Sec. School, Jhajjar, Haryana
- Active Participant, HERizon 2026 (Women in Tech Initiative)
- Solved 100+ Data Structures & Algorithms problems on LeetCode

Certifications

- AZ-900: Microsoft Azure Fundamentals – Microsoft
- Responsible AI with GitHub Copilot – GitHub
- NSPC 2025
- AI-900: Microsoft Azure AI Fundamentals – Microsoft

Hobbies and Interests

- Reading
- Travelling
